

Monday, April 29, 2019
10:00 a.m. – 12:00 p.m.
Shaftsbury Town Garage
North Road, Shaftsbury

*You're
Invited!*

Bennington County Road Foreman Meeting

Towns will be required to address erosion and other stormwater management issues on their roads. Compost may provide a means to do so in many cases. Join **Natasha Duarte, Director of the Composting Association of Vermont (CAV)**, to learn about how to use compost to meet some of the requirements of the Municipal Roads General Permit and Stormwater Management guidelines. Natasha has been working closely with the DEC Stormwater Program and VTRANS on compost-related Best Management Practices.

ANR and VTRANS are evaluating the performance of Recycled Asphalt Shingles (RAS) when blended with natural aggregate for use on the driving surface of unpaved town highways. Two Bennington County towns applied a subsidized RAS/gravel mix last year. **James "Buzz" Surwilo, Vermont Solid Waste Program**, will discuss what has been learned from those experiences, and what's next for this pilot project in 2019.

Lunch will be served
Network with the region's other Road Foremen/Road Crews
